The Securipack Range

Very user-friendly and delivered ready to use, this packaging prevents risks of error or omission. The Securipack range is specially designed for the shipment of samples. There are several versions of this product from 0.25L to 5L, all approved for group 1 (see designs on reverse).

The product includes the following components:

- 1 case (sheath),
- 2 overlapping pockets covered with a foam layer,
- 1 soft plastic holding bag (or hard case option),
- 1 inert absorbent product.

All inner containers are compatible (4GV approved).
Main Characteristics

• High mechanical resistance, especially to stacking by the positioning of double walls on all sides.

• Very high shock-absorbing power on all sides, guaranteeing full protection in the event of a fall.

• Universal application to regulated products except for radioactive and infectious products.

• Patented system, Registered design.

How to use

(Assemble in less than 2 minutes)

1. Push the base halfway up.
2. Insert the container and absorbent into the plastic bag. Close the bag.
3. Fold the flaps.
4. Place the flaps in the final position before pushing everything together.
5. Tape it all together.
